

Cervical & Lumbar Traction

USE CASE 1

USE CASE 2

LOW

Description

Improve patient compliance and provide relief from swelling pain with this comfortable, low-profile design. Two interconnected aircells located beneath the foot arch and in back of the heel apply pulsating compression with every step to provide support for plantar fasciitis and Achilles tendonitis while enhancing circulation. Medial/lateral stabilizers are available to allow for enhanced proprioception and stability. Made of lightweight, breathable *latex-free* fabric and waterproof nylon, AirHeel can be used on either foot and is simple to apply; slip it on like a sock and adjust the fit with one strap. **Ideal for:** Plantar fasciitis, Achilles tendonitis and heel pain.
